Marina Coast Water District
Water Conservation Law

MCWD prohibits the following:

- ❑ Watering lawns or other landscaping between the hours of 10:00 am and 5:00 pm except with a hose with an automatic shutoff nozzle.
- ❑ Allowing substantial amounts of water to run off the area being watered.
- ❑ Hosing hard surfaces such as driveways and sidewalks with water, except as specifically permitted by the District for public health and safety reasons.
- ❑ Permitting the escape of water through breaks or leaks in plumbing facilities (once a leak is detected, it must be repaired within 72 hours).

Violations or failure to correct violations within the specified time will result in fines of up to \$50, termination of water, or a fee of four times the regular water rate for each unit (HCF) of water wasted. To be successful in saving water, Marina's conservation effort needs your active cooperation. In addition to observing the rules yourself, if you notice water wastage please call us at 384-6131 and we will send out a representative.

MCWD's Water Conservation Coordinator is available to answer any questions or help you out with any problems you may have.

Retrofit Requirements

The following plumbing retrofits are required, prior to the close of title, for the sale or transfer of existing residential or commercial property in the Marina Coast Water District.

- ❑ All toilets must be retrofitted with toilets with a maximum flush capacity of 1.6 gallons per flush or less. No flush devices or devices of any other kind will be accepted. Conventional urinals must be retrofitted to water-free urinals.
- ❑ All showerheads must be retrofitted with low-flow showerheads with a maximum flow capacity of 2.5 gallons per minute or less. Installing flow restrictors in existing showerheads does not satisfy the requirement.

Once the property has been retrofitted, an inspection is required. Please call the Water Conservation Department staff at (831) 384-6131 for more information.
