

Indoor Rebates are Available

The holiday season is the perfect time to connect with family and friends. With more people visiting during the holidays, water use drastically increases to accommodate the extra showers, cleaning up after holiday feasts, and more.

To help save on your water bills this holiday season, consider retrofitting to low-flow fixtures and high-efficiency appliances. Marina Coast Water District offers several indoor rebates to help you reduce your water use and save money!

Hot Water Recirculation Pumps:

Tired of waiting for your shower to get warm while water flows down the drain?

A simple hot water recirculation pump can bring you hot water almost instantaneously.

Receive up to \$250.00 incentive for installing a new hot water recirculation system with pump. Before purchasing or installing the pump you must get pre-approved by District Staff.

To get pre-approved and setup a pre-installation inspection, please contact (831) 384-6131.

High-Efficiency Toilets:

By replacing old, inefficient toilets with high-efficiency, WaterSense labeled models, the average family can reduce water used for toilets by 20 to 60 percent—that's nearly 13,000 gallons of water savings for your home every year!

All high-efficiency (HET) or Ultra-high efficiency (UHET) toilets must be EPA WaterSense labeled and/or Maximum Performance Tested (MaP) Premium-rated toilets.

WaterSense HET's (1.28 gpf or less)

- Rebate equal to the net purchase price, up to \$50.
- Rebate equal to the net purchase price, up to \$75 when all the toilets at the account are now HET's or UHET's.

WaterSense and MaP Premium-Rated UHET's (1.1 gpf or less)

- Rebate equal to the net purchase price, up to \$100.
- Rebate equal to the net purchase price, up to \$200 for each new MaP Premium-Rated UHET toilet when all the toilets at the account are now HET's or UHET's.

High-Efficiency Clothes Washers:

High-efficiency washers are designed to reduce the amount of water and energy needed to do a load of laundry. They use up to 80% less water than traditional, top-loading washers, deliver 65% energy savings, and also can wash more laundry in one load than traditional machines.

Clothes washer rebates are available when purchasing an ENERGYSTAR rated clothes washer. Rebate amounts are based upon the machines water efficiency or Water Factor (gallons of water per cubic foot. of laundry cleaned).

Water Factor

Rebate Amount

Above 3.8	None
3.5 - 3.8	\$50
3.0 - 3.4	\$100
2.9 or lower	\$150
